SOFTWARE ENGINEER

PROFILE

Through educational pathways, I had the opportunity to develop several projects, with special interest in security, information retrieve and information systems. Currently, I am finishing my master thesis on financial technologies (Fintech) related subjects, where I intent to build a carrier. This document presents a preview, you can find more details on my personal website indicated above.

EXPERIENCE

RESEARCH SCHOLARSHIP

Aveiro University (September 2016 - October 2018)

- I was part of a team responsible for the development of Cape Verde's Justice Information System. I developed a Dashboard system (Frontend and Backend) to aggregate the current state of hardware using Nagios and software using web services.
- These project led to a scientific publication, referenced below.
- Also, I had the opportunity to provide training to the system's target audience in Cape Verde.

FREELANCER

Senta & Fica (2019)

- sentaefica.pt : Services for Companion Animals

EDUCATION

MASTER'S DEGREE

Aveiro's University (September 2016 - present)

- Master Thesis: Architecture Principles for E-Auction Systems based on Blockchain Tecnology.

BACHELOR'S DEGREE

Aveiro's University (September 2011 - June 2016)

- Final Project: management of autonomous flight drones, using information system, to display and monitor the campus parking lot.

SKILLS

- | | |
|-------------------------------------|--------------|
| • Unix Environments | • Java SE/EE |
| • Full Stack: RESTful Architectures | • Angular |
| • Data warehousing and analytics | • C# |
| • System Administration | • Python |

PUBLICATION

- (2018) - Architecture for Highly Configurable Dashboard for Operations Monitoring and Support
